PROFILE

Results-driven Fullstack Developer, with a knack for creating innovative tools that automate routine tasks and enhance team operations. Adept at leveraging modern frameworks to deliver impactful user experiences and streamline workflows.

SKILLS

Backend Technologies

- **Programming Languages:** Javascript, Typescript, C/C++, Go Lang, Python
- **Databases:** MySQL, PostgreSQL, MongoDB, DynamoDB
- **Frameworks and Tools:** Express, Gin, Node.js

Frontend Technologies

- **Programming Languages:** Javascript, Typescript
- **Frameworks and Tools:** Next.js, React, JQuery, Jest, Redux, Zustand, React Query, Chakra UI, Material UI, TailwindCSS

General Tools

- Git, Github Actions, Bash, Docker

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern

Jun 2024 – Dec 2024 | Gurugram, India

Zomato 🌐

- Redesigned the offer creation flow by introducing a scalable, config-driven system, achieved a **40% reduction in development time** and improving time-to-market by **30%**
- Delivered a custom ad creation tool for the Operations team, achieving **500,000+ impressions** within the first day and establishing a streamlined workflow for creating restaurant stories.
- Enhanced website responsiveness, cutting LCP from over 4 seconds to under 2.5 seconds, meeting **Google's Core Web Vitals thresholds** and significantly improving the site's **SEO rankings**
- Improved overall site stability, achieving an **INP reduction** from 300ms to under 100ms, leading to **better user retention**.
- **Redesigned API documentation**, with an interactive testing playground for Weatherunion's API, replacing static PDFs with an intuitive, user-friendly experience, enhancing developer onboarding and engagement.

Jr. Software Developer

Jul 2023 – Jun 2024 | Noida, India

TradeIndia 🌐

- Migrated the search microservice from Django to Golang, resulting in a **75% decrease in query latency** and an **84% reduction in container size**, driving operational efficiency and cost savings.
- **Rebuilt 3 FastAPI-based microservices in Node.js**, cutting technical debt and enhancing performance upto **110%** by **parallelizing queries**, leading to improved system throughput and reduced latency.
- Written cron jobs to backfill data to Elasticsearch cache, fixing loading time of **200+** pages from **30s to 3s**.
- Created a table to support dynamic specifications data in Postgres. This helped vendors to provide better and diverse product information resulting in better SEO visibility.

PUBLICATIONS AND PUBLIC ENGAGEMENTS

"FFI in JS", FOSS United Delhi

Mar 2024 | Delhi

- Presented conference talk at FOSS United hosted @ IIT Delhi
- Explored Foreign Function Interface in Javascript runtimes
- Created a multi-threaded parser in C++ to demonstrate how we can leverage different runtimes in JS.

"The curious case of typed array optimisations" 🌐

- Documented my exploration of a weird quirk of JS Arrays and optimising my **fuzzy search** algorithm by **70%**

"How I use deepseek r-1 as coding assistant" 🌐

- Published a guide on using Deepseek R-1 with Ollama and VSCode Continue for offline, on-device AI coding assistance.

EDUCATION

B.E Computer Science

Aug 2019 – Jun 2023 | Rajpura, India

Chitkara University 🌐

PROJECTS AND OPEN SOURCE

Monkeys 🌐

- **Transitioned** authentication to a custom service, integrating comprehensive **logging** and **monitoring** to enhance system **reliability** and **security**.
- **Leveraged** a Backend for Frontend (**BFF**) architecture to secure and facilitate cross-domain requests, improving overall system architecture and client interaction.
